MANUFACTURED BY

JOHN RABONE & SONS,

(ESTABLISHED 1784),

HOCKLEY ABBEY WORKS,

BIRMINGHAM.

*ORDERS EXECUTED ONLY THROUGH MERCHANTS AND FACTORS.*

ENTERED AT STATIONERS' HALL

July, 1878.

# HOCKLEY ABBEY WORKS,

BIRMINGHAM, July, 1878.

GENTLEMEN,

In issuing a New Edition of the Price List of the various articles manufactured by us, we have pleasure in pointing out to your notice that it is much more complete, and is better classified and arranged, than any heretofore presented. It has undergone an entire revision : A GREAT REDUCTION HAS BEEN MADE IN THE PRICES of many of the articles, *and in no case have any been increased*. This we have been enabled to do by the progressive improvements in our machinery, and the adaptation of the same to some of those processes, which till now have been effected by uncertain, and at the best, expensive hand labour.

The Boxwood RULES will all be found to be made of well-seasoned Boxwood of good quality, proportioned to the prices ; and instead of having only a few inches divided into sixteenths, as those usually made in the trade, they are marked outside in eighths, and inside in sixteenths the whole length of the rule.

The ENGINE DIVIDED STEEL RULES (pages 40, &c.) are especially recommended for the fineness and accuracy of their graduation, being marked from  $\frac{1}{8}$ ths to  $\frac{1}{16}$ ths of an inch, and are invaluable to Engineers, Machinists, and to all who require great exactness. The other Steel Rules (pages 48, 49) for Smiths' use, will be found to be superior to those usually made.

The STEEL MEASURING TAPES, and the METALLIC WIRED TAPES, will be found of superior quality, being marked by the most modern and approved methods.

In conclusion : Our aim will be, as it has been, to adopt every improvement in machinery, or otherwise, and to still progress and excel in the quality of all goods manufactured by us ; and whenever reductions in prices of materials, or other means enable us, we shall offer to our friends, as we have hitherto done, every advantage in our power, and thus afford them greater inducements and facilities for the disposal of our goods with mutual credit and advantage.

Yours truly,

**JOHN RABONE & SONS.**

In ordering Rules it is sufficient to quote numbers and length, thus No 1155. 2 Feet.

If no FOREIGN MEASURES are specified in order, the goods will be sent English measure.

Box Rules are supplied 2-FEET ENGLISH AND FRENCH MILLIMETRES at List Prices.

If required one metre long, they are charged 6d. to 2/- per dozen extra to 3 feet List Prices.  
(excepting a few expensive patterns.)

Rules marked with THREE MEASURES are charged 1/- to 2/- per dozen extra to List Prices.

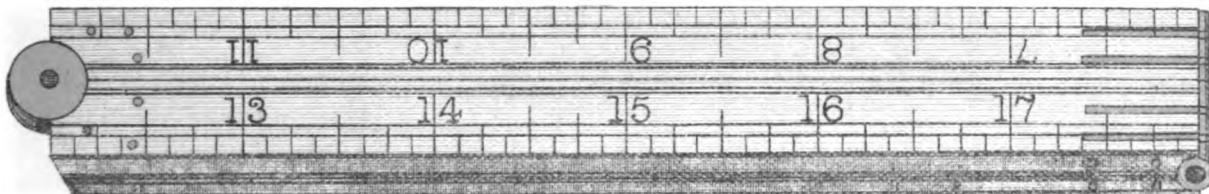

All Rules may be had with any FOREIGN MEASURES to order.

# JOHN RABONE & SONS, ENGINE DIVIDED STEEL RULES.

These Rules are made of best quality steel, well hardened and tempered ; are reliable straight edges, and are Engine divided with unvarying accuracy.

They are made with one rounded end, and with hole for hanging up, but may be had with both ends square if so ordered, at same prices.

The 4 inch and 6 inch Rules are  $\frac{3}{8}$  inch wide  $\times$  22 W.G. thick. The 1 foot Rules are  $1\frac{1}{2}$  inch wide  $\times$  19 W.G. thick.

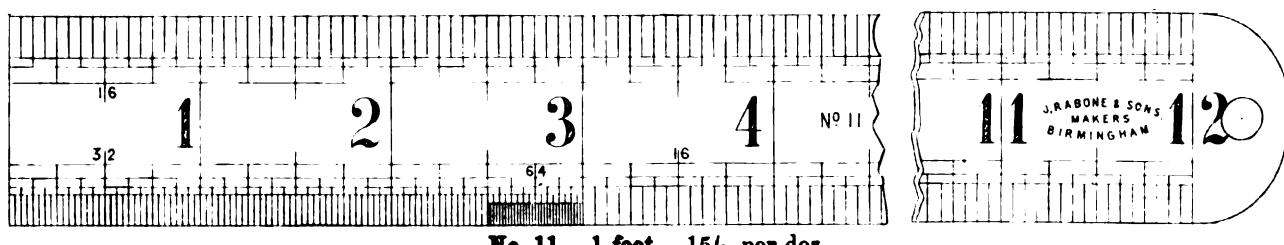

If Nickel Plated, 1 foot, 6/- per doz. extra subject.

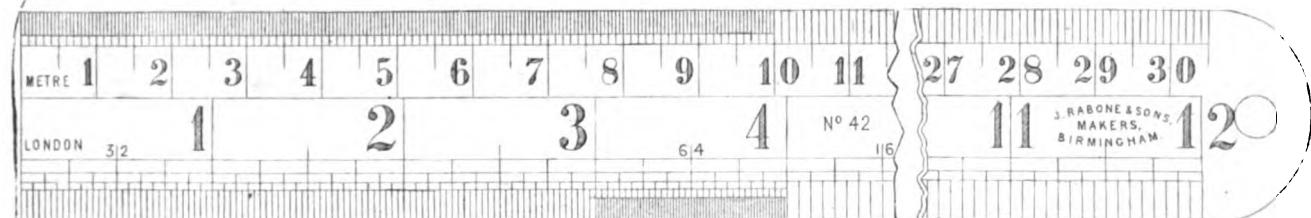

10/- per doz.  
**No. 13. 4 inch.**

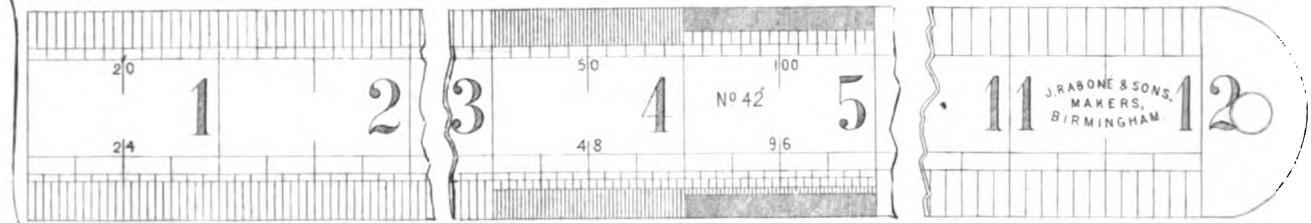

**No. 32. 6 inch. 12/- per doz.**

**No. 11. 1 foot. 15/- per doz.**

**FRONT OF RULE No. 42.**

**BACK OF RULE No. 42. 1 foot. 30/- per doz.**

In ordering these Rules from the following List, it is sufficient to quote the number of Rule and length required thus—No. 10, 12 inch, or No. 10, 4 inch.

The numbers under columns marked "*Top Edge*," "*Bottom Edge*," are the subdivisions of inches into which the Rule is marked.

EXAMPLE.—Rule No. 14 is marked on Top Edge, 8 inches into 20<sup>ths</sup>, 1 inch into 50<sup>ths</sup>, 1 inch into 100<sup>ths</sup>, and remaining 7 inches into 10<sup>ths</sup>; and on the Bottom Edge, 8 inches into 32<sup>nds</sup>, 1 inch into 64<sup>ths</sup>, and remaining 8 inches into 13<sup>ths</sup>.

Any other measures or markings not in the following list, can be made to order at same prices.

Brid. Stationers' Hall.

**Wind-up Measuring Tapes,  
WITH  
Steel Tapes.**

*Full size Drawing.  
OF 66 FEET TAPE.*

STEEL MEASURING TAPES have not hitherto been so widely known and used as their reliability, and freedom from either shrinking or stretching, would entitle them to be. For the Surveyor, they are the most convenient, portable, and trustworthy measures of long lengths. They are accurately marked, and are superior to Chains, as they never alter their length, nor require revision as Chains do. They are also less bulky than the Metallic Wired Tapes, and are considerably lighter.

The weight of the 66 feet Steel Tape with case (No. 415) is only 13 ounces.

MARKED ENGLISH FEET AND INCHES ON ONE SIDE, AND LINKS AND POLES ON THE OTHER,  
OR MARKED ONE SIDE ONLY.

**WITH STEEL TAPE,**

No.                    $\frac{3}{8}$  inch wide.

415. Leather Case, Flush Handle ...
